PROFESSIONAL SUMMARY

Microsoft 365 Consultant and Full-Stack Developer with 3+ years of experience delivering enterprise SharePoint, Microsoft 365, and custom software solutions for public and private sector organizations. Experienced in customer consulting, solution architecture, project leadership, technical training, and application development.

EXPERIENCE

- **PeopleNet A/S**  MAR. 2023 – Present
SharePoint Consultant & Software Developer Copenhagen, Denmark
 - Started as a part-time student developer (MAR. 2023) and was promoted to full-time SharePoint Consultant & Software Developer in FEB. 2024.
 - Worked as lead consultant or consultant in a team of 2-3 people, delivering SharePoint Online intranets. Gathered requirements, designed solution architecture and IA, facilitated workshops, and managed project planning.
 - Delivered continuous SharePoint support to clients in forms of maintaining and managing metadata models, search configuration, sites, permissions and so on.
 - Lead Developer & Product Owner for the company's Microsoft 365 product (365Connect). Responsible for roadmap planning, architecture, feature development, technical documentation, and mentoring developers.
 - Established a structured development workflow and feature delivery pipeline in Azure DevOps, improving project organization and documentation consistency.
 - Developed .Net and Microsoft 365 applications for clients including the Danish Defence, CBS, BankData, SydBank.
 - Designed and delivered professional training courses in C# beginner, C# extended, React, JavaScript, Introduction to programming, SPFx Developer Framework (Online and OnPrem).
 - Developed PowerShell migration scripts and facilitated the migration of large datasets across SharePoint and SQL Server.
 - Acquired new customers through teaching courses and maintaining good customer relations. Example: University College Copenhagen (Københavns Professionshøjskole).
 - External consultant at University College Copenhagen (DEC. 2025 – Present). Advising on Viva Connections implementation and Microsoft 365 architecture and governance, developing SPFx Adaptive Card Extensions.
 - Mentored junior developers through code reviews, technical guidance, and task delegation.
